Stowa kluczowe strictfp, native oraz assert

strictfp

strict floating point (stata zmiennoprzecinkowość)

strictfp class JakasKlasa {...}

native

Java zapewnia integrację kodu napisanego w C z programem napisanym właśnie w Javie

Java Native Interface (JNI)

assert

```
int x = 0;
x == 0;
if (x!= 0) throw new AssertionError();
assert x == 0;
```

strictfp - http://stackoverflow.com/questions/517915/when-should-i-use-the-strictfp-keyword-in-java

native - http://stackoverflow.com/questions/6101311/what-is-the-native-keyword-in-java-for

assert - http://stackoverflow.com/questions/3018683/what-does-the-assert-keyword-do
